MEDICAL DEVICES AND DIAGNOSTICS
CERI SEMINAR

Calling All Scientific Researchers,
Innovators, Students, and Faculty!

Thursday, 2 October 2025 
at **12:30-14:30** SAST

Hybrid, Stellenbosch University,
CERI, Data School seminar room 

The reality of manufacturing diagnostics in Africa – The Medical Diagnostech Story. Current devices and where you sell.

Dr. Lyndon Mungur

CEO of Medical Diagnostech, Dr. Mungur has over a decade of leadership in developing innovative diagnostic solutions. He has led R&D, manufacturing, and regulatory compliance for groundbreaking technologies, including point-of-care PCR and electrochemical diagnostics. His collaborations with universities, governments, and international organizations have placed Medical Diagnostech at the forefront of advancing affordable diagnostics across Africa and beyond.

Lasec and the reality of supply chains/market access in Africa: Case studies of successful and unsuccessful approaches to market entry.

Naledi Plaatjies

With more than a decade of experience, Naledi is a dynamic leader in healthcare business development. At Lasec, she drives initiatives that expand access to scientific and healthcare solutions across Africa. Her work engages Ministries of Health, implementing partners, and research institutions, advancing innovation and market access in resource-limited settings. Holding an MA in Politics and Governance and a BA (Hons) in International Studies, she brings deep expertise in policy-driven, impact-focused strategies that strengthen healthcare systems.
