

SCIENTIFIC SEMINAR SERIES

30 November 2022

Climate change and health: predicting and adapting to climate-related health risks

Time: 12h00 | Wednesday, 30 November 2022

Venue: STIAS, Stellenbosch Campus or virtually*

Presenters: Dr Christopher Trisos

Dr Trisos directs the [Climate Risk Lab](#) for the *African Climate and Development Initiative at University of Cape Town*. His research combines climate, biodiversity, and social sciences to predict where and when climate change risks appear for people and ecosystems, and better understand how societies can respond. Dr Trisos has advised on climate change risks and resilience building for the World Bank, UN Environment Programme, and multiple government agencies. He is also co-author of a choose-your-own adventure game about climate change, called '[Survive the Century](#)'

*Please [register](#) in advance for this seminar. In-person attendance is limited to 30. The seminar will be followed by a lunch at STIAS. If you are staying for the lunch, please register by **23 November**. After registering, you will receive a confirmation email with information about joining the seminar. We look forward to seeing you at the seminar
